

CAPABILITIES  
STATEMENT

A nighttime photograph of a city skyline, likely Sydney, Australia, with numerous illuminated skyscrapers and buildings. A green, glowing arc graphic, resembling a power line or a stylized 'P', is superimposed over the city lights in the lower right quadrant.

# Specialists in complete end to end power quality and protection solutions

*"I have complete confidence..."*

in the Power On Australia team. They are reliable and have the specialist level of technical and project expertise we require to make a success of these complex and challenging projects."

Mining Design Engineer

***Global Mining and Metals Company***

*For over 14 years, we have specialised in delivering long term power quality and power protection solutions for our customers – solutions that are tailored, scalable and deliver clear ROI.*

From servicing mining companies in remote locations throughout Australia, to delivering bespoke power quality and protection systems for Australian Defence in Afghanistan, our significant technical expertise and product knowledge is trusted by leading companies and organisations throughout Australia and overseas.

*The right solution – every time –  
to keep your 'Power On'.*

# Services

*Continuous power supply is critical for your organisation. We understand that. It's why we go **above & beyond**.*

Power outages and power disruption can have a devastating effect on your output, reputation and profit. That's why we offer a range of services to ensure these outages and disruptions are dealt with as quickly as possible. We also put in place solutions to ensure similar disruptions won't happen again.

***We offer fast deployment and 24/7 nationwide support. We're hands on, we communicate in plain English and we go above and beyond to keep you 'Powering On'.***

- One Off Services
- Repairs
- Preventative Maintenance Plans
- Battery Replacements

*"I found Power On Australia's **integrity and honesty** to be refreshing. The difference in service between the other company and Power On Australia was like night and day."*

*Manager*  
**Queensland Health Sector**

# Industry Solutions

## *Broad and diverse industry experience*

We have broad experience in designing and implementing tailored, long lasting power quality and protection solutions for companies and organisations in the following industries:

- Health
- Mining
- Engineering, Construction & Electrical
- Transport
- Industrial & Manufacturing
- Retail & Point of Sale
- Information & Communication Technology
- Security
- Government (local, state, federal)

We have supported customers of all sizes and locations within these industries and have efficiently and cost effectively devised solutions to address their unique power protection and quality requirements.

These solutions have ranged from a simple UPS to back up and protect a critical IT application – to more complex and bespoke solutions, such as a DC power solution for an LTE & RFI communications network, through to supplying and installing a pair of 800kVA Generators in parallel to run a complete mine site.

*For more information on our industry specific solutions, refer to **[poweronaustralia.com.au](http://poweronaustralia.com.au)***

# Products

*Sourced from leading global manufacturers such as Eaton and Emerson, our extensive product range includes:*

- Surge Filters & Diverters
- Power Distribution Units
- Racks & Accessories
- Power Conditioners & Converters
- Transformers
- DC Power Systems
- Power Cables
- Power Factor Correction
- Medical Fridges with Power Back Up
- Load Centres

# Our Team

*Our team goes above and beyond to provide exceptional power quality and power protection for organisations around Australia.*

**Renowned for their product knowledge and technical expertise**, Power On Australia Technicians and Engineers have acquired significant experience working on diverse industry projects in urban, remote and rural locations across Australia and overseas.

Our team is also comprised of financial, logistics, HR, sales and administration staff, many of whom have been with the company for several years. Each member of our team plays an integral part in making your experience with Power On Australia an exceptional one.

**Our core values are integrity, trust and going above and beyond.** With values like that, it's not surprising Australia's leading organisations – small and large – trust us to provide ongoing power quality and power protection.

*"No job is too big for them – the way they turned our project around within a challenging environment was impressive."*

## Accreditations

These accreditations indicate that we have been assessed against internationally recognized standards and have been found to operate to the highest levels of quality and service.

## At Power On Australia we have the answers

*Power is a complex issue, and if not handled by an expert can have an extremely negative impact on your organisation.*

### Current power issues? Planning your power structure for future expansion?

*Our knowledgeable and experienced team will devise the power solutions you really need, and will then help integrate these seamlessly within your existing power set-up.*

### Ongoing Support

*We don't just supply products then leave. Instead, we'll be there to support you through your power protection journey – every step of the way.*
